Ayturgan Karagulova

PYTHON BACKEND DEVELOPER

Backend development
APIs, databases and reliable services

AI & automation
Voice assistants, data and web tools

Experience
Commercial and client projects since 2022

karagulovaayturgan@gmail.com | +996 707 759 955 | Bishkek, Kyrgyzstan | github.com/Ayturgan

01 / Professional experience

Python Backend Developer

COMPANY
Jun 2025 - Oct 2026

.beam

- Developed and maintained production backend services and administrative tools across several products.
- Worked on the SpecTech Django/PostGIS platform for equipment and freight orders, including order responses and role-aware administration.
- Hardened Celery/Redis task handling so broker failures would not block order flows, and added regression coverage.
- Supported Docker releases, production fixes, and server operations.

Python Developer - Client Prototype

COMMERCIAL PROTOTYPE
Nov 2024 - Apr 2025

PhotoBeautyBot

- Built a Telegram photo-processing bot with guided upload flows, image filters, and media handling.
- The prototype was ready for client delivery; the client stopped the project before launch.

Full-Stack Developer - Client Prototype

COMMERCIAL PROTOTYPE
Jun 2023 - Aug 2024

ZyloCoin

- Built a Telegram Mini App with React, Django, user profiles, tasks, referral flows, and TON Connect wallet interfaces.
- The client stopped the project before public launch.

Python Developer - Freelance

FREELANCE
Oct 2022 - May 2023

Self-employed

- Built REST APIs using FastAPI and Django for client projects and internal tools.
- Created Telegram bots for automation, integrations, and parsing tasks.
- Delivered backend features and Telegram bots for client projects.

02 / Skills & technologies

Languages

Python | PHP | JavaScript | TypeScript | SQL | Dart | MQL5

Backend & APIs

Django | Django REST Framework | FastAPI | Flask | Laravel | REST APIs | WebSockets

Web & Mobile

React | Vue | Nuxt | Vite | Flutter | HTML | CSS

Data & Queues

PostgreSQL · PostGIS · MySQL · SQLite · Redis · Celery · Elasticsearch

AI, Speech & Vision

OpenAI · Ollama · Faster-Whisper · XTTS · OpenCV · MediaPipe · LiveKit

Scraping & QA

Scrapy · Playwright · Pytest · PHPUnit · Postman

AI Coding Agents

OpenAI Codex · OpenCode · Antigravity · Aider · GitHub Copilot · ChatGPT · Gemini

Infrastructure

Docker · Docker Compose · Nginx · Linux · Git · GitHub Actions

01 / Areas of work

Backend development

APIs, business workflows, databases, and production services

Data collection & search

Web scraping, data normalization, duplicate detection, and analytics

Integrations & reliability

Task queues, external APIs, regression coverage, and release fixes

Full-stack delivery

Admin and partner portals, mobile API integration, and Docker deployment

AI application prototypes

Voice pipelines, local LLM integration, and computer vision

02 / Languages & focus

Kyrgyz	**Native Speaker**
Russian	**Fluent**
English	**Technical comprehension & documentation, spoken in progress**
Focus	**Backend APIs, data collection, production support, AI integrations**

03 / Education

Degree	**Bachelor's degree, Programmer Engineer**
University	**Kyrgyz State Technical University named after I. Razzakov**
Graduation	**2023**

01 / Featured Projects

SpecTech

Production marketplace for special equipment, freight and service crews. My backend work covered order and responder APIs, role-aware admin flows, Celery/Redis failure handling, and regression tests.

Commercial · Production · Python · Django · PostGIS

Live platform ↗

Advocato

Production workspace for lawyers and legal teams. Contributed backend and product work across role-based access, case documents, search, client portals, CI/CD, and operations.

Commercial · Production · Python · Django · PostgreSQL

Live platform ↗

Estate Parser

Built from scratch: a multi-source real estate collection system with a Scrapy pipeline, FastAPI service, job controls, duplicate detection for listings and photos, search, and analytics.

Personal Project · Built from Scratch · Python · FastAPI · Scrapy

Pointora

Team-built loyalty and payment platform for venues. My contributions span Laravel API features, admin and partner portals, the guest Flutter app, OTP, wallet flows, and notifications.

Commercial · In Development · Laravel · React · Flutter

AppMagic Parser

Built an authenticated browser collection pipeline for AppMagic metrics, with historical PostgreSQL data, analytics API and dashboard, scheduled refreshes, and session management.

Personal Project · Python · FastAPI · Playwright · PostgreSQL

Amanat / EKurulush

Production construction procurement system for requests, tenders, suppliers, contracts, deliveries, claims, acceptance acts, payments, and archives. Contributed to process implementation and release verification.

Commercial · Production · Laravel · Nuxt · MySQL

Live platform ↗

Other projects (11)

Virtual Makeup / AI Beauty

Computer vision portrait and webcam app for virtual makeup and appearance effects. Built from scratch around face landmarks, masks, segmentation, and image processing; the commercial project paused at the client side.

Commercial Prototype · Client Project · Python · OpenCV · MediaPipe

ZyloCoin / Telegram Mini App

Telegram game and Mini App with user profiles, tasks, referrals, balance flows, and TON Connect wallet interfaces. The commercial project did not launch after the client stopped it.

Commercial Prototype · Client Project · Django · React · TON Connect

BBI Telegram Bot

Commercial Telegram bot built from scratch for catalog and request flows, payment details, administrator controls, contacts, and statistics. The client project stopped before launch.

Commercial Prototype · Client Project · Python · Telegram Bot · SQLite

PhotoBeautyBot

Commercial Telegram photo-processing bot built from scratch with guided menus, upload and media handling, and image filters. The client project stopped before launch.

Commercial Prototype · Client Project · Python · Aiogram · OpenCV

Local Voice AI Assistant

Built from scratch as a local text and voice assistant with speech recognition, Ollama/Mistral responses, XTTS speech output, conversation controls, and voice profile selection.

Personal Project · FastAPI · Faster-Whisper · Ollama · XTTS

Streaming AI Voice Chatbot

Real-time voice and text sessions with LiveKit, configurable conversation scenarios, voice profiles, streaming audio processing, and a React control interface.

Personal Project · LiveKit · FastAPI · React · WebSockets

AI Car Call Centre

Real-time voice assistant prototype for car enquiries, with tool calls to look up vehicles by VIN or add vehicle records through an API and SQLite database.

Personal Project · LiveKit Agents · OpenAI Realtime · Flask · React

Bybit Price Analyzer

Scans Bybit futures, detects support and resistance patterns, filters sideways markets, plots candidate signals, and sends charts and alerts through Telegram.

Personal Project · Python · Bybit API · CCXT · Telegram Bot

Overturn X

Modular MetaTrader 5 Expert Advisor with a state machine, trade gateway, basket and trailing logic, persistence, and daily risk controls.

Personal Project · MQL5 · MetaTrader 5 · Risk Controls · Expert Advisor

PixHarbor

One of my first projects: a Flask community gallery with user profiles, image uploads, posts, editing, and comments.

Personal Project · First Projects · Python · Flask · SQLite

Swiftalk Chat Application

One of my first projects: a Django messenger with user accounts, real-time WebSocket chats, file attachments, and notifications.

Personal Project · First Projects · Django · Channels · WebSockets
