Ayturgan Karagulova

PYTHON BACKEND DEVELOPER

Bishkek, Kyrgyzstan | karagulovaayturgan@gmail.com | +996 707 759 955 | github.com/Ayturgan | ayturgan.luxes.studio

Python backend developer with experience maintaining a production Django/PostGIS platform and building API-driven projects from scratch. Works across data collection, business workflows, role-based admin tools, Docker releases, and AI application prototypes.

EXPERIENCE

Python Backend Developer | .beam

June 2025 - October 2026

- Maintained production backend services and admin tools, including the SpecTech platform for equipment and freight orders.
- Worked on Django/PostGIS order APIs and role-aware administration; hardened Celery/Redis failure handling and added regression coverage.
- Supported Docker releases, production fixes, and server operations.

Python Developer | PhotoBeautyBot client prototype | November 2024 - April 2025

Built an Aiogram bot for photo uploads and OpenCV filters. The client stopped the project before launch.

Full-Stack Developer | ZyloCoin client prototype | June 2023 - August 2024

Built a React and Django Telegram Mini App with profiles, tasks, referrals, and TON Connect wallet interfaces. The client stopped the project before launch.

Python Developer | Freelance | October 2022 - May 2023

Built REST APIs with FastAPI and Django, plus Telegram bots for automation, integrations, and parsing.

CORE SKILLS

Backend: Python, Django/DRF, FastAPI, Flask, Laravel, REST APIs

Data: PostgreSQL/PostGIS, MySQL, SQLite, Redis, Celery, Elasticsearch

Web and mobile: React, Vue/Nuxt, Flutter, TypeScript, JavaScript

AI and delivery: OpenAI, Ollama, LiveKit, OpenCV, Scrapy, Playwright, Docker, Linux

SELECTED PROJECTS

SpecTech | Production

Production equipment and freight marketplace. Backend contributions included order and responder APIs, role-scoped administration, safe queue failure handling, and regression tests.

Django, DRF, PostgreSQL/PostGIS, Celery, Redis

Advocato | Production

Legal workspace for case management, permissions, document workflows, full-text search, client portals, and operations.

Django, DRF, PostgreSQL, Redis, Celery

Estate Parser | Built from scratch

Multi-source property listing system with scraper jobs, duplicate detection for ads and photos, search, and analytics.

FastAPI, Scrapy, Playwright, PostgreSQL, Elasticsearch

AppMagic Parser | Personal project

Authenticated collection of app-market metrics, historical storage, analytics API and dashboard, and scheduled refreshes.

FastAPI, Playwright, PostgreSQL, APScheduler

Pointora | In development

Team loyalty and payments product. Contributed API, admin and partner portal, Flutter app, OTP, and wallet features.

Laravel, React, Flutter, PostgreSQL, Stripe

Amanat / EKurulush | Production

Construction procurement workflows from requests and tenders through contracts, deliveries, claims, acceptance, and archiving. Contributed to workflow implementation and release verification.

Laravel, Nuxt, MySQL, Docker, Playwright

Other client prototypes built from scratch: Virtual Makeup / AI Beauty and BBI Telegram Bot. Both stopped before launch at the client side.

AI coding tools used: OpenAI Codex, OpenCode, Antigravity, Aider, GitHub Copilot, ChatGPT, Gemini.

EDUCATION AND LANGUAGES

Bachelor's in Programmer Engineering, Kyrgyz State Technical University (2023). Kyrgyz - native; Russian - fluent; English - technical reading and documentation, spoken English in progress.
